DETAILED ACTION

Claim 8 is pending in this application, and is under examination on the merits.

Information Disclosure Statement

Applicants' Information Disclosure Statement, filed 09/18/2008 has been considered. Please refer to Applicant's copy of the PTO-1449 submitted herewith.

Response to Arguments

Argument over the rejection of claim 8 under 35 U.S.C. §103(a)

Applicant's argument over rejection of claim 8 has been fully considered, but is found not persuasive. First, the Examiner's characterization of the holding in the *Pfizer* case is based on MPEP§2143(E) under "Obvious to Try" and Example 1, it states "The court rejected the notion that unpredictability could be equated with nonobviousness here, because there were only a finite number (53) of pharmaceutically acceptable salts to be tested for improved properties". Second, the *Santo* compounds [II]-4, [II]-16, [II]-17, [II]-19 and [II]-25 have the core organic structures read on the instantly claimed core organic structures, and the only difference between the prior art and the instant application is the anions, namely Br⁻, SbF₆⁻, ClO₄⁻ and NO₃⁻ for the *Santo* compounds, and CF₃SO₃⁻ for the instantly claimed compounds. However, the anions including CF₃SO₃⁻ are disclosed in the same Santo reference, and all the anions listed at paragraph [0027] of the Specification are expressly stated as the anions "X" of the instantly claimed core organic structures as the original teaching, and there is no

second reference. Third, the comparative testing data analysis of Examples 8-10 with Comparative Examples 3-4 does not really show unexpected results at all, because they are not direct side-by-side comparison (i.e. Comparative Example 3 has anion F₆P⁻, and Comparative Example 4 has anion B(OH)₃). None of the anions (i.e. F₆P⁻ and B(OH)₃) are disclosed in the cited *Santo* compounds. At last, In response to applicant's argument that the compounds in Examples 8-10 show better stability, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). Therefore, the rejection is maintained.

Conclusion

- Claim 8 is rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
